

## **PTS Diagnostics Announces New Portable Data Capture System for Screening Professionals**

*PTS Connect® ScreenPro is a self-contained, double-encrypted, HIPAA-compliant data hub*

INDIANAPOLIS (Dec. 19, 2017) – PTS Diagnostics, a U.S.–based manufacturer of point-of-care biometric testing devices, today announced that they are releasing PTS Connect ScreenPro, a portable data capture software designed specifically for wellness screening professionals.

Unlike other portal systems, PTS Connect ScreenPro does not require internet access and delivers a customized wellness report equipped with either a screener’s or customer’s logo. It’s equipped for use with PTS Diagnostics’ CardioChek® analyzers and is compatible with tablets and printers.

“Screeners want accurate and well-organized aggregate data reports so that they can make informed decisions about their wellness programs,” said Robert Huffstodt, President and CEO of PTS Diagnostics. “PTS Connect ScreenPro’s printable, double-encrypted and HIPAA-compliant reports can be instantly downloaded to USB or PC at the end of an event, allowing for a fast and efficient data analysis.”

Developed by StatBridge LLC and powered by the company’s Oxygen software, PTS Connect ScreenPro is designed specifically for the professional screening market. This product is a multiple encrypted software and hardware solution for remote, non-Wi-Fi, and Wi-Fi enabled environments.

“We’re enthusiastic to partner with a leader in point-of-care diagnostics and optimistic that we’ll improve the field of population health, providing screening participants with accurate results that drive better wellness decisions,” said Peter Brew, CTO and Co-Founder of StatBridge LLC.

### **About PTS Diagnostics:**

*Through its People, Technology and Service, PTS Diagnostics creates health innovation that drives action and results. Since 1992, we have helped medical professionals and patients achieve better health outcomes through our accurate, precise, fast, affordable, and certified point-of-care medical devices. Healthcare professionals have used our CardioChek products to assess cardiovascular disease risks for more than 140 million patients worldwide through lipid panel screening. And, our AICNow® systems, which provide fast and reliable HbA1c testing, have*

*helped physicians deliver more effective treatments to patients with diabetes. From our headquarters in the United States of America, we design, manufacture, and market our products to more than 140 countries around the globe. For more information, visit [ptsdiagnostics.com](http://ptsdiagnostics.com).*

**About StatBridge LLC:**

*StatBridge, LLC was born to bridge the gap between high tech point-of-care testing and low tech paper and pencil data collection systems which have been the industry standard. With the successful launch of OXYGEN, Health and Wellness screening companies have access to a state-of-the-art technology platform which provides intuitive operation, seamless client registration, elimination of transcription errors, and secure data collection and storage.
