preVantage **ConnectedQC**™

Simplify Point-of-Care Quality Control

PreVantage ConnectedQC™ is a user-friendly suite of software solutions designed to help organizations streamline their point-of-care testing, quality control, and regulatory compliance processes.

- Review and document quality control information in real-time
- Meet regulatory requirements
- Track and inventory devices
- Administer policies and procedures

Quality Control Result Tracking and Reporting

Our cloud-based software solution is designed to streamline device inventory and quality control practices.

Device inventory includes…

- In-service/removal dates
- Total test counts
- Current location
- QC results

Statistical Quality Control Reports

Our reporting feature allows you to easily demonstrate compliance with state regulations, saving time and money in the event of an audit.

Reports are…

- Inclusive of Levey Jennings charts
- Available at the licensing organization level
- Available as a peer comparison in standard and custom queries

---

eTrueNorth

Additional resources available through our strategic partnership:

eReg POCT (From eTrueNorth)

Your organization can minimize staff time related to researching and updating regulatory requirements with this comprehensive and cost effective solution.

It provides…

- State and local regulatory requirements related to point-of-care testing
- Contacts
- Compliance checklists

eP&P POCT (From eTrueNorth)

Set your organization up for success with eP&P POCT's easy-to-use, configurable set of CLIA-waived laboratory policies and procedures templates.

Template documents…

- Provide guidance on configuration
- Help to ensure compliance with CLIA-waived requirements
- Help to ensure compliance with state-specific policy and procedure documentation

Also provides…

- Notifications of updates to requirements, to help keep Policies and Procedures manuals current
- P&P reviews at a minimum on a biannual basis

eVoucher (From eTrueNorth)

Help close gaps in care by allowing employees to complete wellness screenings at CLIA-waived laboratories in local retail pharmacies.

The eLabNetwork software…

- Coordinates eligibility, scheduling, voucher creation and billing
- Allows employees to receive test results at the point of care
- Securely transfers data to the employer's health and wellness portal in real-time
