

A Great Start to a Healthy Heart

The American
Academy of
Pediatrics
recommends¹
cholesterol
testing for...

**All children
between**

9&11
years old

**Children
between**

2&10
years old
who...

- Have parents or grandparents who have had heart attacks, been diagnosed with blocked arteries, stroke, or disease affecting the blood vessels, at age 55 or earlier in men, age 65 or earlier in women.
- Have parents or grandparents who have total blood cholesterol levels of 240 mg/dL or higher.
- Have an unknown family health history (e.g. adopted children.)
- Have characteristics associated with heart disease such as high blood pressure, diabetes, smoking, or obesity.

**CardioChek® Plus
Professional Analyzer**

¹ AAP: Cholesterol Levels in Children and Adolescents, 12/3/2015: <https://www.healthy-children.org/English/healthy-living/nutrition/Pages/Cholesterol-Levels-in-Children-and-Adolescents.aspx>

Lab-Quality Results at the Point of Care

The CardioChek Plus analyzer achieves accuracy similar to that of a clinical laboratory, but only requires a small (40 µL) blood sample from a fingerstick.

- **Fast:** Full lipid panel results in as little as 90 seconds. Can measure lipids and glucose simultaneously
- **Accurate:** Meets NCEP guidelines for accuracy and precision
- **Flexible:** Measures total cholesterol, HDL cholesterol, triglycerides, and glucose
Also calculates LDL, TC/HDL ratio, LDL/HDL ratio, and non-HDL cholesterol
- **Cost-effective:** Start-up cost is minimal; tests may be reimbursable
- **User-friendly:** CLIA-waived
- **Portable:** Compact, battery-operated, room temperature test strip storage

PTS Panels® Test Strip Options

Lipid Panel+eGLU Smart Bundle 2-Pack	(REF 2729)
CHOL+HDL+GLU	(REF 2412)
Total Cholesterol	(REF 1711)
HDL Cholesterol	(REF 1714)
Triglycerides	(REF 1716)
Glucose	(REF 1713)
eGLU	(REF 2713)
CHOL + GLU	(REF 1765)
CHOL + HDL	(REF 1821)
Lipid Panel	(REF 1710)

Get Started Today

Add even more value to your patients' check-ups with point-of-care lipid panel testing.
