

Easy Data Transfer for Your Next Wellness Event

The ability to automatically and wirelessly collect biometric information and then transfer with or without internet is crucial for success and security at wellness events.

CardioChek® Plus Analyzer Key Features

Accurate

Measures four unique analytes – Cholesterol (Total & HDL), Triglycerides, Glucose

Fast

Results in as little as 90 seconds

Easy to Use

CLIA-waived, battery powered, room temperature storage of test strips and controls

PTS Connect Blu-Adapter™

Uses Bluetooth® technology to transfer test results from CardioChek® Plus and PA analyzers via the MEMo Chip® port.

May reduce transcription errors when compared to manual data entry.

PTS Connect® Printer

Outputs biometric information on paper and self-adhesive labels in an easy-to-read format.

Connects to the CardioChek analyzer via cable.
